FHP-4250 ECO-MODE for various Enclosure Temperatures

The graph shows the total capacity (W) of the FHP-4250 ECO-MODE for different enclosures temperatures. The x-axis represents the ambient temperature (°C), while the y-axis represents the total capacity (W). Different colors indicate different enclosure temperatures: 25°C (light green), 30°C (green), 35°C (blue), and 40°C (dark green). The capacity decreases as the ambient temperature increases for all enclosure temperatures.
