

## OVERVIEW

The D100 and D200 Condensate Discharge units allow accumulated water to drain out the bottom of an enclosure. The UL-approved discharge units also function as an air pressure equalizer, reducing the harmful effects of temperature-induced vacuums that could pull water and moisture into the enclosure.

## FEATURES

- Uses gravity to remove collected liquids
- One-way mechanical shut-off when pressure is equalized prevents water and contaminants from entering the enclosure
- Helps reduce corrosion that can limit the life of internal electrical and electronic components
- Installs in a 7/8-in. hole in the bottom of enclosure with provided nut or in a 1/2-in. NPT/NPS threaded conduit hub
- Installs in the bottom of mild steel, aluminum, stainless steel or non-metallic enclosures
- Maintains enclosure's NEMA rating when properly installed
- Available in Stainless Steel and Non-Metalic Polyester material
- UL 508A Listed; Type 4, 4X; File No. E617

## SPECIFICATIONS

MODEL	NOTE	D INCHES	D Millimeters
D-100	Non-Metalic	1.25	32
D-200	Stainless Steel	1.38	35
